The ScrubAir Pipette Washer/Dryer automates the traditionally time-consuming process of washing and drying glass volumetric pipettes.

**Thoroughly cleans pipettes inside and out.** Percolating action of compressed air and water scrubs the interior walls while water and detergent cascade down the outside walls.

**Saves water and money.** Compared to traditional siphoning methods that can use over 600 liters per load, the eco-friendly ScrubAir uses as little as 12.5 liters of tap/pure water, which adds up to water savings costs of \$2900 or more.

**Dries quickly** with compressed air in about four hours. Models with built-in heater dry twice as fast—two hours.

**Accommodates from 12 to 60 pipettes** depending on bulb and stem diameters.

**Programmable.** Factory cycle settings may be user modified. Start time may be delayed up to 8 hours.

**Portable.** The ScrubAir hooks to a sink faucet allowing it to be easily transported from lab to lab. Or, install it using a dedicated water supply and drain.
