

Secure vaccine storage

For a limited time, save up to 40%* on select TSX Series High Performance Refrigerators and Freezers

Thermo Scientific™ TSX Series cold storage products are designed and built to support the temperature requirements of pharmaceuticals and vaccine manufacturing, distribution, and storage worldwide. Our products deliver safe and reliable vaccine storage while supporting accreditation and quality management standards.

Powered by V-Drive STeM or V- Drive variable speed compressors, the TSX Series ensures the temperature continually adapts to the lab or clinical environment, maintaining a tight window around the set point. When there are frequent door openings, the control system detects the activity and increases the drive speed to bring temperatures back to the set point quickly.

Compared to general purpose laboratory refrigeration products, the Thermo Scientific TSX Series cold storage products offer the following features:

Sample protection
Tight temperature uniformity with 25% more storage capacity

Energy efficiency
Uses 50% less energy (SNAP-compliant)

Quiet operation
20x quieter

Thermo Scientific™ TSX Series High-Performance Undercounter Refrigerators

Powered by V-drive STeM technology, the TSX Series High-Performance Undercounter Refrigerators offer redundant cooling and twice the storage capacity of traditional undercounter refrigerators ensuring ideal conditions for the most demanding applications.

Thermo Scientific™ TSX Series High-Performance Refrigerators

Essential for any lab working with critical samples sensitive to temperature variation, the TSX Series Refrigerators are ideal for: vaccines, enzymes, chemotherapy and pharmaceutical compounds, and other valuable and sensitive medical- and laboratory-grade products.

Thermo Scientific™ TSX Series High-Performance Auto Defrost Freezers

Thermo Scientific TSX Series Auto Defrost Freezers are built for the most demanding applications. Utilizing V-drive, these freezers maintain a low temperature range near -30°C to minimize the impact of temperature increase during defrost cycles. The forced air circulation design provides uniform temperature throughout the cabinet and rapid recovery from door openings.

Product	Promotion price	Cat. No.
TSX Series High-Performance Undercounter Lab Refrigerator, Solid Door	\$3,225	50-TSX505SASP
TSX Series High-Performance Pharmacy Refrigerator, 12 cu. ft.	\$5,385	50-TSX1205PARP
TSX Series High-Performance Pharmacy Refrigerator, 23 cu. ft.	\$6,250	50-TSX2305PARP
TSX Series High-Performance Auto-Defrost Freezer, 23 cu. ft.	\$6,470	50-TSX2330FARP
